DHEC invites your participation in a proposed permit renewal and corrective action decision. DHEC is proposing issuance of a permit for regulation of postclosure care of hazardous waste activities to Santolubes Manufacturing LLC (dba Blackman Uhler Specialties) located at 2155 West Croft Circle in Spartanburg, South Carolina. The draft permit has been written to comply with the South Carolina Hazardous Waste Management Regulations and the Resource Conservation and Recovery Act, as amended by the Hazardous and Solid Waste Amendments. The permit, if issued, will renew the RCRA permit for the Santolubes (Blackman Uhler) facility as required by DHEC for postclosure care of a closed hazardous waste management unit and corrective action for solid waste management units (SWMUs) and areas of concern (AOCs).

The draft permit contains conditions for the following:

- Postclosure care of a closed surface impoundment (aeration basin) and one Corrective Action Management Unit (CAMU)
- Continued removal of hazardous constituents released to the groundwater at the facility
- Identification of SWMUS and AOCs at the facility and corrective action for those units, if needed.

The proposed Corrective Action Decision for the facility is described in a Statement of Basis (SOB). The Statement of Basis is designed to inform the public and to provide an opportunity to comment on the proposed corrective action activities.

**The Statement of Basis and draft permit are open for public comment from August 15, 2011 to September 29, 2011.** DHEC encourages all interested persons to participate in this permitting process.
